INTERNSHIP

WEB DEVELOPER — FODAVIN TECHNOLOGIES

09/2025 - PRESENT

- worked on the e-learning platforms frontend, creating features tested by over **50 pilot users**, which shows my focus on **quality delivery**.
- Used **troubleshooting** skills to fix and improve existing **JavaScript** code, achieving a **15% boost** in how fast the app loaded, showing **continuous improvement**.
- Learned the team's project process by making an average of **3-4 commits daily** and managing code using **Git/GitHub**.

ACADEMIC PROJECTS

Online Car Rental System

03/2025

- Developed a complete working system (**100% functional**) for car rental inventory using **PHP/MySQL**, applying **analytical skills** to manage all transactions safely.
- Used **problem-solving** to build key features (like admin and user logins) that automatically managed inventory, which **cut down manual updates by 80%**.
- Built the user interface (HTML, CSS, JavaScript), using innovative thinking to streamline the booking experience.
